

American Healthcare Telemedicine/Telehealth Certification

American Health Care Professionals (AHCP)

WELCOME

On behalf of everyone at American Healthcare Professionals, I want to welcome you to the new Certified Telemedicine/Telehealth Professionals (CTTP) 3-day course. The course was updated to reflect the latest research and ideas in telemedicine/telehealth and we are pleased to be able to offer the course to you.

American Healthcare Professionals has a team of talented and well-versed leaders. We have connected with thousands of people in telemedicine/telehealth and helped them improve their knowledge. Additionally, we have educated numerous individuals in telemedicine/telehealth with the result being enhanced knowledge, skills, and capabilities, as well as enhanced work skills within telemedicine/telehealth organizations. We continually hear from individuals about the trials, achievements, and the journey they partake to influence the people in their organizations. This is a great time to be involved in telemedicine/telehealth.

This course blends the latest research, best practices, methodologies and thought leaders. Also, the course provides tools to be used to guide and apply telemedicine/telehealth strategies. We focus on knowledge, skills, and application for telemedicine/telehealth. Telemedicine and Telehealth, overall, are vital topics and have continued to rise in significance over the past 15 years. American Healthcare Professionals have connected with a growing number of professionals who comprehend the worth of effective telemedicine/telehealth application; however, are not certain of how to begin the work.

Appropriately, this telemedicine/telehealth course provides broad attention on practical tools, real-world application, and imparting of best practices during the course timeframe. This course includes information regarding telemedicine/telehealth terminology, technology, forms, understanding the telehealth team, record keeping, and building knowledge of telehealth programs. Participants will learn to depict examination rooms and procedures, as well as recognize the benefits that telemedicine/ telehealth brings to diverse pinpointed audiences.

This is not simply a course; American Healthcare Telemedicine/Telehealth Certified Professional is absorption of the art, science, and practice of telemedicine/telehealth with case studies, assessments, practical tools, multimedia presentations, and group interactions. This course is designed to improve each participant's knowledge, skills, and capabilities in telemedicine/telehealth through teaching, group participation and prevailing tools and discussions.

Upon completion of this course, and completing an assessment work product, passing the post course assessment, and then completing an evaluation, participants will be awarded the Certified Telemedicine/Telehealth Professionals--CTTP designation. Completion of the Certified Telemedicine/Telehealth Professionals--CTTP means that you will be a part of a select team or professional who will lead in telemedicine/telehealth.

Welcome, thank-you for your support for American Healthcare Professionals. Please keep us informed of the influence that this certification has on you and your career.

Regards,

Dr. Clisha Taylor, RN, MBA, DMIN, CDP
